

## **AREVA Facility Visit Policy**

### **Security**

AREVA's Technical Training Center is not only a state-of-the-art training facility for our customers and employees but also a center for ongoing research and innovation. The Fuel Manufacturing Facility at Mt. Athos Road is a licensed nuclear facility as well as an operating fuel production plant. Due to heightened security and work in progress at both facilities, the following procedures apply to all visitors:

1. Valid I.D. is required at Security Check-In. Passport required for foreign nationals.
2. A list of attendees is required one week prior to the tour. Please indicate if any attendees are not U.S. citizens.
3. No cameras – including cell phones with cameras – allowed within the facilities.
4. Your group will be under escort at all times while inside both facilities.

### **Attire**

To ensure a safe and efficient visit, the following dress code is required:

1. No sleeveless or “flowy” tops.
2. Shoe must completely encompass the foot – NO heels, sandals or open toed shoes.
3. Natural fibers are recommended.
4. Safety glasses and hard hats will be provided where required.

### **Audio / Video Policy**

As stated above, due to heightened security and to protect proprietary information, no cameras, no cell phones with cameras, and no audio or video recording devices are allowed in either the Technical Training Center or the Fuel Manufacturing Facility.
